Methodology:

1. *Save as much existing fabric as possible*
2. *Limited incursion*
3. *Utilized Objectives Based Provision of 2005 NBC*

1. *Save as much of the overall heritage interior as possible.*

1. *Save as much of the overall heritage interior as possible.*
2. *Definitely save defining heritage characteristics such as quality of space or unique elements of constructions.*

1. *Save as much of the overall heritage interior as possible.*
2. *Definitely save defining heritage characteristics such as quality of space or unique elements of constructions.*
3. *Very selectively make incursions into existing fabric to meet contemporary requirements.*

1. *Save as much of the overall heritage interior as possible.*
2. *Definitely save defining heritage characteristics such as quality of space or unique elements of constructions.*
3. *Very selectively make incursions into existing fabric to meet contemporary requirements.*
4. *Restore original fabric where historical evidence is available.*

- 1. Save as much of the overall heritage interior as possible.*
- 2. Definitely save defining heritage characteristics such as quality of space or unique elements of constructions.*
- 3. Very selectively make incursions into existing fabric to meet contemporary requirements.*
- 4. Restore original fabric where historical evidence is available.*
- 5. When required, fully utilize alternate NBC code compliance methods under the Objective Based Solution provision of the 2005 NBC.*
